MANUFACTURING MATERIALS HANDLING EQUIPMENT & TRUCK DUMPERS

7463 Highway 69 S. Springville, TN 38256 • (731) 593-3426

## ADVANTAGES OF USING WHOLE CONTAINER LINER BAGS FOR PLASTICS & POWDERS

[www.aminternationaltnllc.com](http://www.aminternationaltnllc.com)

- . Suitable for free-flowing pellets or powders
- . Most exporters of plastics & powders worldwide are familiar with or capable of loading plastics & pellets in whole container liner bags
- . Average savings of over \$ 1,000 per container
- . Much quicker unloading than for a container of smaller bags
- . Less plastics/material loss than unloading smaller bags

## LESS RISK OF CONTAMINATION FROM FOREIGN MATERIALS DURING UNLOADING

- Unload one liner bag instead of 20 or more super sacks or hundreds of 25 kg. bags
- Especially important for Food Grade and Medical Grade applications
- Examples: water bottles, soda bottles, medical grade tubing, prescription bottles and nutritional supplement bottles

## Less Packaging Waste - More Freight

- Load more plastics or powders and less packaging in shipping containers
- Whole container liner bag made of polyethylene weighs 35 lbs. compared to 160 lbs. for 20 polypropylene super sacks
- No need for 20 wooden shipping pallets per container weighing an average of 60 lbs. each
- 5 steel tubes for bracing liners in container can be reused or recycled
- Save an average of \$300 to \$500 or more on ocean freight by using 20' containers instead of 40' containers for dense plastics such as PET and PVC
- Load containers up to 30% heavier than when using super sacks

## American International TN LLC's Container Tipplers are Cost-Effective and Easy to Install

- We have designed a unique 20' / 40' container tipper
- The complete unit can ship in one 40' high cube container or one legal truck load
- Takes only 16 labor hours to assemble
- No crane required for setup of equipment
- Unloads 20 or 40' containers without any adjustments
- Easy, Low-Cost Installation
